

The background features a series of concentric, slightly wavy lines in shades of blue and orange, creating a sense of depth and movement. On the right side, there is a stylized, abstract figure of a person in a dynamic pose, rendered in a light blue color that blends with the background.

EXPO博覽會 2025

PASSPORT

Growth, Advancement, Achievement

Where culture and diversity meet

The background of the slide is an abstract composition of numerous thin, flowing lines in shades of orange and yellow. These lines create a sense of movement and depth, resembling a stylized landscape or a digital data flow. The lines are more densely packed in some areas, creating a gradient of color from a pale yellow to a deeper orange.

Welcome

Over the past twenty years, the rapid advancement of technology has drastically changed the way the world operates. Technology now allows people the opportunity to communicate from opposite ends of the globe. Toronto's Expo 2025 aims to shine a spotlight on the fantastical technological advances being made at this time, and innovations for our future as relating to sustainability, learning, and the main goal of every world expo, the linking of cultures from all over the world.

Event Listings

MAY

Ecohome by Fan Yi Fei

The Shanghai architect discusses the benefits of making small changes to your daily life in efforts to save water. His model of a futuristic Shanghai home displays rooms for grandparents as well as children and examples of how to save one of China's most sought after resource: water.

MAY 8 AT 2:00 PM
CONFERENCE HALL

Energy Storage Devices

Energy storage devices or physical systems store energy for later use. Over

the coming decade, advancing energy-storage technology could make electric vehicles cost competitive, bring electricity to remote areas of developing countries, and improve the efficiency of the utility grid.

MAY 10 AT 7:30 PM
COMMUNITY BUILDING

Advanced Robotics

Increasingly capable robots or robotic tools, with enhanced "senses," dexterity, and intelligence – can take on tasks once thought too delicate or uneconomical to automate. These technologies can also generate significant societal benefits, including robotic surgical systems that make procedures less invasive, as

well as robotic prosthetics and “exoskeletons” that restore functions of amputees and the elderly.

MAY 13 ALL DAY
JAPAN PAVILION

Deep Learning

With massive amounts of computational power, machines can now recognize objects and translate speech in real time. Artificial intelligence is finally getting smart.

MAY 21 AT 4:00 PM
CONFERENCE HALL

JUNE

Ultra-Efficient Solar Power

Doubling the efficiency of solar devices would completely change the economics of renewable energy. Here is a design that just might make it possible.

JUNE 1 ALL DAY
NEW ZEALAND PAVILION

Memory Implants

A London maverick neuroscientist believes he has deciphered the code by which the brain forms long-term memories.

JUNE 3 AT 11:00 AM
CONFERENCE HALL

Big Data from Cheap Phones

Analyzing information from simple cell phones can provide surprising insights into how people move about and behave—and even help us understand the spread of diseases.

JUNE 11 AT 7:00 PM
CONFERENCE HALL

Baxter: The Blue Collar Robot

Rethink Robotics’ new creation is easy to interact with, but the innovations behind the robot show just how hard it is to get along with people.

JUNE 15 ALL DAY
AUSTRALIA PAVILION

JULY

Additive Manufacturing

GE, the world’s largest manufacturer, is on the verge of using 3-D printing to make jet parts.

JULY ALL MONTH
UNITED STATES PAVILION

Prenatal DNA Sequencing

Reading the DNA of fetuses is the next frontier of the genome revolution. Do you really want to know the genetic destiny of your unborn child?

JULY 2 ALL DAY
COMMUNITY BUILDING

Global Sustainability Jam

Learn and apply design-thinking best practices under tutelage of mentors and facilitators. And at the final presentation, get feedback and advice from panel of industry experts.

JULY 4 AT 3:00 PM

COMMUNITY BUILDING

Carnival of the Bold

Showcasing a mix of performances and work by various artists, the night will touch, entertain, humour and provoke, and also connect you with changemakers and others who care about a better world.

JULY 10 AT 12:00 PM

PERFORMING ARTS CENTER

Merge: An Exhibition of Photography

Mimeses North is a newly formed collective of emerging photographers from across the north of England held together by a common philosophy through which all are motivated by concern for the welfare of mankind and the sustainability of our environment and resources.

JULY 20 ALL DAY

UNITED KINGDOM PAVILION

Green Living in Hong Kong Exhibition

The exhibition showcases green living concepts in Hong Kong and the latest inventions. The exhibition showcases the economics of green technologies as well as the implications for the sustainable development of the PRD region.

AUGUST ALL MONTH

CHINA PAVILION

Grow Your Own Food

Year-round vegetable gardening is integral to creating a food system whose values reflect seasonality, locality and clean food. Join

local expert gardener Carey Craddock and take a closer look at achieving a healthy garden and a bountiful harvest all year round.

AUGUST 13 ALL DAY

UNITED STATES PAVILION

Cars and Alternative Energy

The exhibit will contrast the damaging nature of the current car with new cars that run cleanly. Visitors can learn about the process of creating an eco-friendly car and the recent developments in the world of this exciting and fast-paced technology.

AUGUST 19 AT 10:00 AM

ITALY PAVILION

Seminar on “Green Technologies, Planning and Opportunites”

The seminar shares details of the HKSAR’s environmental policy that encourages the development and implementation of green technologies for industries in the Pearl River Delta (PRD). It also covers the joint regional planning study “The Regional Co-operation Plan on Building a Quality Living Area”, as well as the business opportunities arising from this.

AUGUST 20 AT 8:00 PM
CONFERENCE HALL

Cinematic Theatre: Food, Inc.

A different kind of documentary. Rather than target

the conditions in which animals are raised for food or how many environmental changes are brought about by mass animal breeding for food purposes, Food, Inc. deconstructs the illusion that advertisers carefully cultivate: the concept that our food production even remotely resembles farming anymore.

AUGUST 23 AT 7:00 PM
PERFORMING ARTS CENTER

Contemporary Art and the Environment

This event is part of Evergreen’s Innovation Talks lecture series. The lecture will feature artists Nicholas Laverdiere from BGL, Dean Baldwin & Jennifer Marman.

AUGUST 30 AT 2:00 PM
CONFERENCE HALL

Eco Fashion Show

The event will feature three of Brisbane’s innovators in fashion along with the students from Mt Gravatt Sustainable Fashion Department. Designers include The Green Shop, Remade by Bird Hands, One Colour, and Metropolitan South Institute of TAFE students who have translated their passion for sustainability and ethical clothing into their unique creations.

SEPTEMBER 4 AT 8:00 PM
PERFORMING ARTS CENTER

Biophilic Design: The Architecture of Life

Biophilic Design is an innovative way of designing the places where we live, work, and learn. The recent trend of green architecture has decreased the environmental impact of the built environment, but it has accomplished little in the way of reconnecting us to the natural world. Come on a journey from our evolutionary past and the origins of architecture to the world’s most celebrated buildings in a search for the architecture of life.

SEPTEMBER 7 AT 12:00 PM
COMMUNITY BUILDING

Passport Stamps

**Australian Sustainability Exhibition**

Australian Sustainability Conference & Exhibition is the newest, most innovative event dedicated to the sustainable future of today's Australian businesses. Australian Sustainability brings together suppliers and solution providers in an exhibition that will be a magnet for companies looking for commercial solutions to environmental challenges.

SEPTEMBER 12 12:00 PM

AUSTRALIA PAVILION

**Introduction to Rainwater Harvesting**

Now is the perfect time to start planning in preparation for the annual autumn

and winter rains. In this hands-on class, you'll learn what to consider and where to start with systems as simple as a single barrel under a downspout, or as complicated as an indoor plumbing system for toilet flushing.

SEPTEMBER 28 AT 3:00 PM

COMMUNITY BUILDING

**Film: Planeat**

Planeat is the story of three men's search for a diet that is good for our health, the environment, and the future of the planet. The film features compelling research presented by prominent doctors and scientists, who are supported by a cast of talented chefs.

SEPTEMBER 30 AT 2:00 PM

PERFORMING ARTS CENTER

**Spaces: Designing Within Density**

For many, urban living is synonymous with small spaces. As residential spaces in dense urban centers shrink continually, we question the meaning of "living". Join an exploration into some of these tight spaces, and investigate creative strategies for extending living spaces outside of these confines.

OCTOBER 7 AT 7:00 PM

COMMUNITY BUILDING

**Ways of Being**

Believing that all children are intelligent and different

from each other in how they learn, how does one create conditions for learning that facilitate children's different ways of being and their powers of thinking?

OCTOBER 15 AT 4:00 PM

COMMUNITY BUILDING

**Bloom: A Sustainability Show**

This show will demonstrate how simple choices can bring sustainable ideas alive in our gardens and local communities. By exhibiting flower designs and interacting in the open, park-like space, everyone can witness the importance of sustainability. Topics from nutrition, to energy, to local farming will be discussed.

OCTOBER 26 AT 7:00 PM
